

Beyers Koffie is one of the major producers of coffee products.

Beyers is now looking for a S&OP / Masterdata Manager, who can manage a small team (1 Production Planner + 1 Masterdata responsible).

Jobprofile :

S&OP / Masterdata Manager

The S&OP Manager will be the global owner of the day-to-day activities of Sales & Operations Planning (S&OP) process and the therefore required masterdata.

The S&OP process is focused on short term and long-term planning, and decision-making optimizing customer service levels, achieving production results at lowest possible operational costs and maximizing revenue.

The S&OP Manager will be responsible for building the S&OP process collaborating cross-functionally with Commercial, Finance, Service desk as demand planner, and Manufacturing. Next to this role you will also be responsible for Masterdata collection, integration and datasharing in the ERP systems and traceability systems.

In this role, you will have 2 direct reports and you will need to be strong in cross functional team management.

The role will focus on:

- The implementation and adherence to the S&OP process in all relevant functions sales, production, demand planning
- Collaborating with key stakeholders to develop and maintain critical interfaces, assessment and management of critical S&OP KPIs and metrics.
- Coordinating the effort of all teams on a tactical level and providing key feedback to management on progress.

RESPONSIBILITIES AND SPECIFIC ACCOUNTABILITIES

- You drive implementation of the S&OP process in all areas.
- You align demand and production capabilities in a constructive way
- You are hands-on Production planner and can act as a fallback of your direct reports in case of absence.
- You manage related processes, flow of information, resource and stakeholder relations.
- You communicate common targets for continuous improvement, responsiveness and agility.
- You manage the weekly S&OP KPIs and metrics.
- You ensure S&OP process is duly documented and documentation is kept up-to-date

EDUCATION, EXPERIENCE AND SKILLS

Education

- University degree, ideally formal education in Supply Chain, Logistics or related discipline.

Job Experience

- 5+ years in demand and/or supply planning or other relevant supply chain experience in a complex systems environment
- Excellent knowledge and in depth understanding of the supply chain flow and end-to-end supply planning process, in particular demand, supply and production planning
- Preferably, experience working in a matrix organization
- Detailed knowledge of S&OP processes and system will be a significant advantage
- Process and project management skills and experience
- Prior exposure to management reporting
- Cross functional leadership experience

Knowledge and Skills

- Knowledge and thorough understanding of end-to-end Supply Planning process and customer service
- Experience with SAP ERP / MRP replenishment systems,
- Excellent knowledge Microsoft Office (Excel)
- Excellent English, written and spoken
- Understanding and knowledge of the concept of Bill of Materials and related replenishment strategies
- Good analytical skills
- Strong people networking skills and teamplayer
- Excellent interpersonal, communication and presentation skills
- Responsible and proactive, assertive, strong sense of urgency
- Organized and process oriented
- Stress resistant
